# Here are the requirements for the Website you're going to develop:

- Feel free to use any of JavaScript frameworks/libraries (Angular, React, Vue, or jQuery) & its plugins.
- Fully responsive of full-screen layout & no scrollbar.
- All animations (including the button & link's hover state) should be smooth and not overdone.
- The slide transition should be fade-out & fade-in (upon clicking the navigation & on mouse-scrolling as well).
- All images & background images should be responsive as well.
  They SHOULD NOT be loaded until screen size has been detected. This is required to improve page loading & to reduce data usage.

LOREM IPSUM DOLOR

Lorem ipsum dolor sit amet, consectetuer adipiscing elit. Donec odio.
Quisque volutpat mattis eros.

Slide #1

A full-screen HTML5 video (set to be looping & mute) as background with semi-transparent white background overlay.

You can use this video: http://www.w3schools.com/html/mov_bbb.mp4

The copy & slide indicators on the right side should be horizontally & vertically center-aligned. *(Using of flexbox layout is recommended.)*

The copy should be animated.

The slide indicators should be treated as slide navigation.

The arrow at the bottom should be linked to 2nd slide (the 1st slide fade-out, the 2nd slide fade-in).

You can download the set of images here:
https://drive.google.com/drive/folders/0B-rD5IVdShxLVlFYZmFCaHF6V3M

For large & medium screen:
• Please use: **img-1920x1200.jpg** & **img-1280x800.jpg**
• The image should be in perfect full-screen.

For medium screen, portrait mode:
• Please use: **img-800x368.jpg**
• The copy should not overlay the image.

For small screen:
• Please use: **img-800x368.jpg**
• On portrait mode, the copy should not overlay the image.
• On landscape mode, the image should be shifted to the left & the copy on the right side (follow the large & medium screen layout).

"DISCOVER MORE" link should be appeared on 2nd slide, and it should be disappeared again on 1st slide.

The copy should be vertically center-aligned.
(Using of flexbox layout is recommended.)

The image & copy should be animated.

The HTML structure for reference:

```
<!doctype html>
<html>
  <head>
    ...
  </head>

  <body>
    <header>
      <a href="#">[LOGO]</a>
      <a href="#">[DISCOVER MORE]</a>
    </header>

    <nav>
      <ul>
        <li><a href="#">[Slide Indicator for SLIDE #1]</a></li>
        <li><a href="#">[Slide Indicator for SLIDE #2]</a></li>
      </ul>
    </nav>

    <main>
      <section>
        [SLIDE #1]
      </section>

      <section>
        [SLIDE #2]
      </section>
    </main>
  </body>
</html>
```
